Switch Devices while Keeping the Static IP- Article no. 1272

Introduction

Static IP Address are available to **Business Solutions** customers across **all Sites**

- They are **no longer available** to **Residential** customers **effective November 1, 2023**

- Existing Residential Static IP customers are grandfathered

Important: switching devices without following these instructions results in the loss of the Static IP address

Resolution Steps

- Verify the **Cable Modem** is connected to the **Network** and the old device via **Ethernet**

- The customer releases the **Static IP address** assigned to the device, then **replaces** the **old** device with the **new** device

- Power cycle **the Cable Modem** so it pulls the **same Static IP** to issue to the **new device**

- If the customer **swaps Cable Modems**, the **Static IP** address transfers to the new modem

- If these steps don't resolve the issue, click **Create Work Order or Technical Case** in **BOLT**

  Fill out the information as described below and click **Submit**
