Reprovisioning Equipment- Article number 1901

Introduction

This procedure is to reprovision the Data portion of equipment

Resolution Steps

Reprovision a Cable Modem

- Go to the **Customer Equipment Maintenance** [**BX**] screen

- **Highlight** the modem and click the **Remove Occurrence** button

- On the line where you removed the occurrence:

    - Click in the **CT** column and add a **D**

    - Click in the **Occ** column and hit **F4** on the keyboard to select the **correct occurrence** and hit **Enter**

- **Send a Refresh Hit**

- Go to the **Balancing [EB]** screen and hit **Enter**

- Access the **Provisioning Transactions [PT]** screen to ensure there are **no errors**

- Access **Merlin** to make sure the provisioning updated

Adding a Data User

- Activate the username to complete the data service reconnect; these steps need to be repeated for **every username** showing on the **Data User** [**DU**] screen

  - Highlight the username by clicking on it

  - Click the **Change** button

  - Click **Resend Login** from the menu on the left

  - The username should already exist

    - If no username present, check **How to Establish a Data User ID**

- If the customer has **TiVo(s)**:

  - **Re-provision the TiVo(s)**

  - Confirm services are working

Avoid reprovisioning an EMTA wherever possible

- If it is deemed necessary to reprovision an EMTA, it should **only** be done if there is **no phone service** attached
